

Request for Proposal — Smart City Traffic Management

1. Client / Organisation

City of Northbridge

2. RFP Reference Number

RFP-2026-GOV-901

3. Solution Domain

Government / Smart City

4. Region

United Kingdom

5. Submission Deadline

12 Aug 2026

6. Background

The City of Northbridge invites proposals for an intelligent traffic management system to reduce congestion, improve safety, and integrate with public transport.

7. Functional Requirements

- Deploy adaptive traffic signal control across 200 intersections.
- Provide real-time congestion monitoring using camera and sensor data.
- Integrate with the public transport priority system.
- Offer a public-facing travel information portal.
- Provide an analytics platform for city planners.

8. Non-Functional Requirements

- System availability of 99.9%.
- Process video analytics within 500 ms per frame.
- Scale to 500 intersections in future phases.

9. Compliance & Security Requirements

- Comply with UK GDPR for any captured personal data.

- Adhere to public-sector procurement transparency rules.
- Accessibility compliance (WCAG 2.1 AA) for the public portal.

10. Commercial / Pricing Line Items

- Adaptive signal controllers (per intersection, 200 intersections)
- Central management platform (annual license)
- Installation & civil works (labor, estimated 4000 hours)
- Maintenance & support (per year)

11. Evaluation Criteria

- Technical solution 35%
- Social value & accessibility 20%
- Compliance 20%
- Cost 25%

12. Submission Instructions

- Responses must be submitted in PDF or DOCX format by the submission deadline.
- Vendors must address every functional and compliance requirement explicitly.
- Pricing must be itemised and valid for 90 days.
